

▶ Ranger Confined Space Collector

▶ SIMPLICITY BY DESIGN

The Ranger CSC is the only body on the market that safely allows the automated arm to extend from within the confines of the body before it grips a cart.

Pull carts away from fences or other obstacles safely even in the tightest spaces.

The compact telescoping arm retracts inside the width of the truck so the operator can maneuver easily between obstacles in a narrow alley or other confined space.

Easily separate carts and reduce grip/un-grip time with grippers that stow partially closed.

Make your approach simple and less time consuming by trying the 'Confined Space Collector' on your route.

▶ EFFICIENT

- Automatic Pack Cycle
- One Piece Packer/Follower
- Tapered Body for Easier Discharge
- Self-Locking Tailgate w/ Watertight Seal

▶ RELIABLE

- Electric Over Hydraulic Controls
- Positive Stop Piston Pump Means No Oil Flows Until Controls Are Activated
- 96" Reach Body Mounted Arm
- Universal Cart Grips - 30 to 96 gal
- Cylinders Manufactured by Texas Hydraulics
